

University management, members of Erasmus+ capacity building in higher education - CBHE project, participants of Erasmus+ International credit mobility ICM and employees of the International Relations Department took part in the presentation of the projects.

At the meeting, the senior teacher of the "Mathematical Engineering" department, A. Babadzhanova, presented the projects "Development of the master program on Computational Linguistics and open online courses-CLASS" and "Establishment of Computing Centers and Curriculum Development in Mathematics Engineering Master program-ECCUM", "Geography , geodesy, cartography" department associate professor M. Matchonov "Environmental Protection in Central Asia: Disaster Risk Management with Spatial Methods-EPCA" project, as well as "Physics" department associate professor O. Otamurodov "Development of Master Program in Renewable Energy Sources and Sustainable Environment They made a presentation on the works carried out under the "RENES" project. The presentations and effective work within the framework of the program attracted the attention of Ambassador Charlotte Adrian and the members of the delegation, who were thoroughly discussed with questions.

Students and young people who participated in the international credit mobility of the Erasmus+ program also participated in this meeting, and they had the opportunity to communicate directly with Ambassador Charlotte Adrian. The students expressed their desire to study and gain experience in foreign universities in the future within the framework of the program.

The delegation of the European Union in Uzbekistan, which visited our university, visited the faculties of Foreign Philology and Physics and Mathematics.

Along with seeing the conditions created for students and young people at the faculties, they had an interesting dialogue with them. Students of the Faculty of Foreign Philology participated in the lessons of French and German. They specially recognized that the students' ability to speak foreign languages is very well formed and they express their opinion easily.

They also visited the "Physics" department and got acquainted with the laboratories organized on the basis of Erasmus+ projects.

Thus, the visit of the delegation led by the Ambassador of the European Union to Uzbekistan, Charlotte Adrian, to our university ended.
